Please reject the NAB's petition 04-160

I am an XM user because I desire an alternative to AM/FM formats. I am willing to pay for commercial free listening, news and weather. Our country was built on developing technology in a competitive marketplace. My choices should not be in control of a group who represents the past or special interest. What they should do is improve their product and let competition thrive. Then we will all continue to benefit.

Thanks,

BA
